### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The title has been amended to be more descriptive of the invention as follows:  
"Waveguide for autostereoscopic display having a plurality of switchable portions of diffusive material within the waveguide for providing either scattering or light-transmissive light to the display".

### **Reasons for Allowance**

2. The following is an examiner's statement of reasons for allowance: None of the prior art of record, nor uncovered to date shows the now recited features of a waveguide for use in illuminating a display panel comprising, *inter alia*,: a first face for receiving light; an exit face for which light may exit; configured so that light enters the waveguide and is scattered by a plurality of portions of diffusing material located within the waveguide and leaves the waveguide through the exit face, thereby illuminating the display panel, and wherein at least one of the plurality of portions can be switched between a state in which the portion is predominantly light-transmissive and a state in which the part is predominantly diffusive (Claim 1).

3. The rejection based on Putilin (US 2002/0018158 in view of Hiyama et al. (US 6,222,598) no longer meets the limitations of this claim as the diffusive material 232 of waveguide 230 in Hyama does not switch between light-transmissive and diffusive

Art Unit: 2871

states as now required by the claim. Thus, Claim 1 along with dependent Claims 2-10, 13 and 15-17 are therefore deemed allowable over these references.

4. Moreover, none of the prior art shows or discloses a waveguide configured so that light is scattered by a plurality of portions of diffusive material within the waveguide, and in which the material thereof is a liquid crystal material (Claim 11). Margerum et al. (US 5,099,343) cited in the rejection of 03/19/2008 does show a diffusive material within a plurality of portions 22-26, but the portions make up a display panel 12, and not a waveguide for a display panel. As such, Claim 11 along with dependent Claim 12 is deemed allowable as presently advised.

5. Claim 14 recites many of the same features as Claim 1, and therefore is allowable.

6. Independent method Claims 18 and 25, along with dependent Claims 20-24 now recite a method of setting a least one portion of a layer of diffusive material wherein the act of setting optical properties comprises applying a potential difference across said at least one portion (Claim 18); and wherein the optical properties of said at least one portion are set so that backlighting comprises a plurality of light lines and the image is a 3D image; and determining a position of a viewer and adjusting the pattern of light lines and the image according to the determined viewer position (Claim 25). None of the prior art cited above nor uncovered to date shows or discloses these features. As such, these claims are deemed allowable as presently advised.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2871

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOHN HEYMAN whose telephone number is (571)272-5730. The examiner can normally be reached on 7:30am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on 571- 272-1787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
